

MAGNA HALF HEIGHT TURNSTILE

The Magna gate offers an efficient and aesthetic option for access control with its stylish design.

All the gate models are space efficient security barriers with a compact design, yet offer sufficient space to integrate any access control system. They can be mounted with card readers, biometric readers, remote control and push button units via simple dry contact.

Durability with minimal maintenance

means years and millions of trouble free passages. The gate creates a secure environment in a reception for example. Our gates are used in applications, including stadiums and arenas, perimeter and interior security, recreation and amusement parks, retail crowd control and lobby access control.

In case of an emergency or power failure, the gate provides a fail-safe working solution by allowing free passage on both directions.

PASSAGE WIDTH:	< 900 mm
THROUGHPUT RATE:	35 p/m
POWER SUPPLY:	100-240 V(ac)
OPERATION VOLTAGE:	24 V (dc)
MAX POWER CONSUMPTION:	35 W
PROTECTION LEVEL:	IP 44
WORKING TEMPERATURE:	-25°C -+ 70°C
ELECTRO-MAGNETIC DRIVE:	DC
DIMENSIONS, EXCLUDING BARS:	1400x185x1020 mm
NET WEIGHT:	95 kg
HOUSING:	Made in metal sheet and painted with 20/10 or stainless steel AISI 304
BARRIER SWINGS:	Plastic Plate, toughened glass, stainless steel frame
LID(OPTIONAL):	Stainless steel or artificial stone
